

A photograph of a red car body on a production line. Two robotic arms, wrapped in white protective material, are positioned on either side of the car. The car is mounted on a metal frame. The background is a light-colored wall.

JERNBRO®

MAINTENANCE
FOR BETTER FLOW IN PRODUCTION

GET MORE FOR LESS

Do you need help to perform and improve your maintenance? Maybe you lack sufficient resources? Maybe you lack the required competence? Whether you want to reduce your costs or increase operational availability in your plant, you can talk to us at Jernbro.

We have a **wide maintenance offering** and can help you with everything from customising maintenance agreements and resource reinforcements to single component repairs.

MORE SAFETY

MORE EFFICIENCY

MORE AVAILABILITY

IMPROVED PRODUCTIVITY
AND REDUCED TOTAL COSTS

IS YOUR BUSINESS WORKING EFFICIENTLY ENOUGH?

WE HAVE THE ANSWER.

To be able to offer you world-class maintenance, we work according to our methodology, the **Jernbro Maintenance Way**, which we have developed ourselves. With this method we just don't identify what needs to be done but also how and why. If you follow the plan, you will reduce your maintenance costs and increase reliability.

JERNBRO MAINTENANCE WAY

Jernbro Maintenance Way (JMW) is a model for evaluating, analysing, and producing plans to develop your maintenance activities.

We evaluate maintenance activities according to a standardised model and measure development over time. It allows us to compare various maintenance operations. JMW becomes a tool for benchmarking.

The model is based on best practice and supports cost-effective maintenance with high operational availability.

Based on best practice and each customer's unique situation, goals, challenges and resources, we produce individual development plans.

GET FULL CONTROL OF YOUR MAINTENANCE

All our services have one goal. To give you full control so that your production flows more safely and more efficiently. In-depth competence, understanding of the conditions in industry and closeness to our customers mean we dare to promise this.

BROAD EXPERIENCE GIVES YOU BENEFITS

We have our roots in Swedish industry. With our broad, In-depth knowledge of maintenance, we can apply knowledge from other industries to your organisation. Share experience from these industries:

Manufacturing Industry
Chemical industry
Steel industry
Food industry

Pharmaceutical industry
Pulp and paper industry
Power and heating industry

DEVELOP YOUR MAINTENANCE

Let our maintenance engineers help you increase availability and safety or streamline the actual maintenance work. Several of our engineers are also certified maintenance leaders according to EFNMS (European Federation of National Maintenance Societies).

SKILFUL RESOURCES – CLOSE TO YOU

Within Jernbro you have access to 300 mechanics, welders and hydraulic technicians as well as 120 electricians and instrument technicians with experience from several industries and with great interest in new technologies. Our expertise is available locally in several locations.

GREATER PEACE OF MIND WITH A MAINTENANCE AGREEMENT

One challenge facing many maintenance managers is that the need for resources and competence varies widely. An agreement with us at Jernbro guarantees that you have the right resources at the right time. Here are examples of the agreements we can offer in dialogue with you:

- ☐ **Preventive maintenance**
- ☐ **Corrective maintenance**
- ☐ **Contingency contracts**
- ☐ **Operational availability contracts**

If you are considering outsourcing your maintenance, you should talk to us. We have both the knowledge and capacity required.

INCREASE THE LIFETIME OF YOUR COMPONENTS

Instead of throwing components away and buying new, it can often be a wise decision to extend their lifetime. We perform service on the following components:

Control systems and electronics

Servo actuators

Servo and electric motors

Spindles

Pumps and gearboxes

Large electric engines

Generators

Transformers

ELECTRONIC COMPONENTS VIA OUR WEB SHOP

Here you can order printed circuit boards, servos and other electric items. You can also order replacement units, service of components or systems. You can find our web shop on webshop.jernbro.com

WE COULDN'T HAVE SAID IT BETTER OURSELVES

What's it like working with us at Jernbro? Those who know best are our customers.

IT CAN'T GET BETTER THAN THIS

"Being able to retain our expertise and secure production, at the same time as it works out well for co-workers. It can't get better than this."

Mikael Arnham, Arla Foods.

Received help with personnel takeover and a maintenance agreement before relocation of their plant.

300 IMPROVEMENT SUGGESTIONS

"Jernbro has presented 300 suggestions for improvement and we at Husqvarna have chosen to implement most of these. This is well in line with the heavy focus we have on continuous improvements."

Magnus Wohlin, Husqvarna.

Received help with maintenance development and agreements for maintenance resources.

THEY ARE VERY KNOWLEDGE-ABLE AND FLEXIBLE

"It feels good to hand over responsibility for this management to Jernbro. They are very knowledgeable, vital in such a complex assignment. I really trust that they know what they are doing."

Catarina Fransson, Hector Rail.

Received help with electronics service.

MORE COMPETENCE WHEN NEEDED

"There are plenty of opportunities to bring in more competence when needed. This is a great strength."

Christer Rosén, Stora Enso Wood Products.

Received help with a total maintenance agreement.

WHAT IS YOUR
MAINTENANCE CHALLENGE?

WE CREATE LOCAL GROWTH

Our goal is local growth and development. This is why we invest locally.
Many of us live locally. Our children go to school in the neighbourhood.
We care about its survival – for the next generation. We strive to develop
business relations with local companies. In this way, we secure the competence
for more efficient and safer production in your local area.
It also creates new job opportunities.

OUR MANY CUSTOMERS

From small and mid-sized companies to large international groups.
We have also followed our customers out in the world and helped them
with both assignments and machine deliveries.
